

2nd SUN STAKEHOLDERS' WORKSHOP

Seeking User Feedback on SUN Decision Support System

Wednesday 7th OCTOBER 2015

Sala Conferenze, [Scientific Campus](#) of the University Ca' Foscari of Venice, Via Torino 155,
Mestre, Venice (IT)

About the Workshop

The current understanding of the environmental and health risks of manufactured nanomaterials (MN) is still limited, which may result in stagnation of nanotechnology innovation. The EU FP7 Sustainable Nanotechnologies (SUN) project is based on the idea that this knowledge can nevertheless guide nanomanufacturing to avoid liabilities if risk analysis is complemented by a sound socioeconomic analysis in an integrated approach addressing the complete product lifecycle. This is the main rationale behind developing the SUN user-friendly, software-based Decision Support System (SUNDS) for managing the environmental, economic and social impacts of nanotechnologies.

Based on previous rounds of stakeholders' interviews and a workshop, we have built a conceptual decision framework and methodology and started implementing them into the SUNDS software system. This workshop will present the beta prototype of SUNDS to the intended end users: Representatives of industry, regulatory and insurance sectors, in order to collect their feedbacks for further improvements towards the implementation of the final version of the software by March 2017.

We look forward to seeing you at the Second SUN Stakeholders' Workshop.

For more information about the SUN project, visit us at <http://www.sun-fp7.eu/>

2nd SUN Stakeholders' Workshop Agenda

9.20-9.30 Welcome and Aim of the Workshop

9.30-10.00 Round-table presentation of participants

10.00-10.50 Introduction to SUNDS: from the conceptual decision framework to the software system (including questions)

10.50-11.10 Coffee break (and transfer to Lab 3, Zeta building)

11.10-13.00 SUNDS Hands-on Demo – part 1

13.00-14.00 Lunch

14.00-15.30 SUNDS Hands-on Demo – part 2

15.30-16.00 Coffee break (and transfer to the conference room, Alfa building)

16.00-17.30 Companies in a value chain need to decide on sustainable manufacturing

17.30-18.00 Conclusions and closure of the workshop

Organizing Committee

Malsch TechnoValuation (The Netherlands)

Ineke Malsch

University Ca' Foscari of Venice (Italy)

Elena Semenzin

Danail Hristozov

Alex Zabeo

Vrishali Subramanian

University of Limerick (Ireland)

Martin Mullins

Finbarr Murphy

TNO (The Netherlands)

Toon van Harmelen

Tom Ligthart
